English French Spanish

EXPERIENCE

Marketing Analyst May 2021 — Present
BTJN, LLC Houston, Texas

- Optimized marketing strategy by identifying 25,000 most valuable potential customers out of over 300,000.
- Created graph database to analyze personal customer characteristics that correlate with higher returns on investment.
- Improved analysis pipeline efficiency by 95 percent by integrating data with PySpark and Google Drive API from a Neo4j warehouse.

Sales Strategist October 2019 — February 2021
BTJN, LLC

- Defined sales strategy to target well funded public organizations for greatest ROI.
- Compared sources to identify most competitive manufacturers to procure personal protection equipment for large organizations.
- Deployed a custom CRM solution to facilitate sales analytics.

Sales Analysis Internship January 2020 — August 2020
Cox Oil Company

- Discovered supply chain bottlenecks by product for 57 retail stores with Python Statsmodel and Pandas.
- Piloted application to generate daily sales reports for store managers to streamline inventory screening.

Research Lead and Analyst Jan 2018 — Aug 2019
University of Central Florida Orlando, Florida

- Identified regional socioeconomic features correlated with higher investment risks.
- Reviewed feasibility of Turkish government proposals to develop hydroelectric plants in underdeveloped regions.
- Developed international law frame work from primary sources to reveal governmental criminal activity which could result in economic sanctions.
- Prepared publication presentation peer reviewed at the Peace Science Conference at the Hague, Switzerland.

Research Assistant Jan 2017 — Jan 2018
University of Central Florida Orlando, Florida

- Managed team data coding, verification, and storage procedures for article published by Cambridge University Press.
- Analyzed United Kingdom parliamentary procedures to predict likely policy outcomes.

PROJECTS

- Rail Demand Tool:** Plotted international rail demand indicators by transit station.
- Shipping Analysis Tool:** Analyzed historical shipping data of ships that entered US territorial waters to specify trade volume and port of origin.
- Oil Demand Tool:** Graphed historical crude oil shipping volume and demand.
- US Supreme Court Metadata Graph:** Clustered Supreme Court cases by political issue area to identify commercial clause cases.
- AI Policy Prediction Paper:** Predicted policy outcomes with TensorFlow.
